

Prayer Pups Sunday Funnies Customization

When opening the PDF files in Adobe Reader, you may be presented with a bar that allows you to “Highlight Fields.” If that’s available to you, click the “Highlight Fields” button and all of the customizable areas will be highlighted in color and you may personalize them as you like.

If you’re not presented with that option, listed below are the areas that may be customized on each bulletin. Just drag your cursor over the same area on your downloaded files and click. Then you may start typing your church’s information

Prayer Pups Sunday Funnies can be customized on the front page on the top.

You may put your church's name, address, phone and website address there.
